

Work Truck Step Installation Instructions for Mercedes Sprinter Van

Part No: 501080, 501087

1. Mount the Rear Steel Bracket to the pan with 5/16" hardware provided and securely tighten them to the pan. Use the two 1" long 5/16" bolts for these brackets.

2. Assemble the cover and Front Steel Brackets to the step assembly as shown. Use the 1" long 5/16" bolts and the 5/16" washers and nylon lock nuts for this assembly. Securely tighten all of these bolts.

3. Take the entire step assembly and lift it up inside the vehicle behind the side door. It is highly recommended to use a floor jack or something to rest the step assembly on while completing this step. Make sure the Rear Steel Bracket is up against the middle cross member as shown. Take the 1/2" hardware and assemble it to the vehicle but only hand tighten. This 1/2" bolt assembly will be tightened in step 7.

Work Truck Step Installation Instructions for Mercedes Sprinter Van

Part No: 501080, 501087

4. With the step assembly resting on a floor jack or something similar take a pencil or pen and use the holes in the Front Steel Brackets as a guide and mark 2 holes on the inside surface of the pinch weld.

5. Lower the front end of the step down to expose the marked holes. Take a drill motor (a right-angled drill motor will make this easier) with an 11/32" drill bit and drill out the marked holes. Remove all burrs.

6. Take the remaining 5/16" hardware and securely tighten the Front Steel Brackets to the vehicle. Now go back and securely tighten the 1/2" bolt assembly to the vehicle. The Rear Steel Bracket will be slightly at an angled which does not cause any issue regarding the installation.

7. Now your step is ready to go. Push the step in to lock in its closed position. Push it again to deploy it. We recommend using a garage door opener silicone spray on the rails from time to time to insure smooth operation of the step.
